

Test Case 0007

System: VirtuCardsHost

Description: Tests that the host application creates rooms in Photon with unique codes.

Severity: 2

Instructions

1. Start an instance of the VirtuCardHost application.
2. Sign In to the application.
3. Click the Create Room button.
4. The VirtuCardHost application will now display a waiting screen that lists the Photon Room Code. It should be in the form of a string of six capital English letters.
5. Note the displayed Room Code.
6. Press the arrow acting as the back button.
7. Click the Create Room button again.
8. The VirtuCardHost application will now display a waiting screen that lists the Photon Room Code. It should be in the form of a string of six capital English letters.
9. Note the new displayed Room Code.
10. Evaluate whether the two noted Room Codes are identical or not.

Expected result: The two noted Room Codes should both be strings of six capital English letters and should not be identical.
